Freedom Pharmacy
Specialty Division

Oncology
MedsExpress™

Through the
"Circles of Care"™
A Specialty Pharmacy

Both Freedom Pharmacy and Cystic Fibrosis Pharmacy have been providing specialty retail pharmacy services since 1984. Both pharmacies have created distinctive levels of care for their patients by implementing a model that includes pharmaceutical manufacturers, payors, physicians, pharmaceutical care and pharmacy services. The pharmacies focus on medications for chronic, high-cost and rare diseases. Available products include oral, injectable and transdermal medications, intravenous infusions, nutritionals, specially compounded formulations, small durable medical equipment and medical supplies. Each patient is included in a Circle of Care®, which includes a pharmacist, nurse and reimbursement specialist to help maximize care.

MANY OTHER SPECIALTY MEDICATIONS AVAILABLE

Retail Pharmacies rarely stock these high-cost medications. When a patient encounters a no-stock situation therapy starts are delayed, patients are inconvenienced, and the physician's office is inevitably involved in helping to resolve the problem. Freedom Pharmacy's Specialty Division can eliminate all those headaches because we always stock available medications in large quantities. We know what it takes to service Oncology patients and we do it right.

8. Rx FILLED and SHIPPED to Patient
9. Process Claim (Health Plan or PBM)

To learn more, contact Freedom Pharmacy at 888.307.4427 or visit www.freedommeds.com
Dear Doctor,

With more than 30 years of experience in the pharmacy business, Freedom Pharmacy is one of the only complete pharmacies specializing in dispensing the full range of oncology medications in Central Florida.

We are a specialty pharmacy with national and international reputations for quality and satisfaction. We are staffed by local pharmacists - Freedom understands the needs of busy oncology practices. We can supply all of your pre-meds and injectables, as well as direct-to-patient high-cost oral chemotherapy agents, from one of the largest inventories in the state. Our goal is provide you and your patients with the costly and often hard to find prescription drugs necessary for chemotherapy and other treatment regimens both inexpensively and conveniently.

However, our Oncology MedsExpress™ program is designed to provide more than just dispensing services. We can also help you manage some of the more time consuming aspects of an oncology practice - dealing with health insurance companies. Freedom not only understands the complexity of health insurance, but we can assist your patients in receiving maximum insurance benefits. In so doing, your office staff is also relieved of the frustrating task of insurance verifications and authorizations. This can measurably improve practice cash flow while lowering costs for the office. We accept most insurance plans and pharmacy cards (PBM's), Medicare, and Medicaid.

We also realize that cancer medication can be extremely difficult for a patient to manage at home, therefore, important components of our medication management services include:

♦ Refill reminders
♦ Adherence counseling
♦ Side-effects monitoring
♦ Therapy coordination (particularly for patients requiring home nursing care)

Interested in learning more about Freedom Pharmacy and how we can help you? It's simple. Either call us at the number below for more information or fax a completed referral form (enclosed) to the number at the top of the form (407-897-2108). We will confirm receipt of the order and dispense and ship medications for next-day delivery to your office or the patient's home.

We look forward to showing you how Oncology MedsExpress™ can both help you and your practice while also being a superb addition to your patients' chemotherapy care team.

Sincerely,

Lois Adams, RPh
President

Ms. Adams is President and CEO of HHCS Health Group of which Freedom Pharmacy and Wellness Centers is a member. She is also President and Executive Director of the Center for Memory Disorders, Inc.

Freedom Pharmacy Specialty Division

Your Therapy Management Partner...
Seeking Improved Health Together

Freedom Pharmacy knows how challenging a chronic illness can be for a patient. And the challenges often increase once a patient begins a regimen of pharmacy designed to manage their condition. That's when a partner can make a world of difference.

Over the past thirty+ years have worked with tens of thousands of patients in partnership, working together to get the best possible results from every prescription. That may include dealing with side-effects, injection techniques, nutrition, even financial burdens associated with obtaining your medications.

We've seen it all and we have lots of solutions. At Freedom, we've wrapped this experience - and commitment - into a patient-centric program called...

"Circles of Care"™

Medications
At Freedom we maintain a large inventory of all forms of therapy for chronic illnesses including injectables, infusables, and oral forms of drugs typically not stocked at retail pharmacies. Our Pharmacists and Clinicians are experts at managing each therapy and will coordinate your drug plan with your doctor.

Education
Well informed patients simply do better on therapy than patients who don't understand their disease and how their therapy works. Our staff works closely with you to inform you and enable you.

Communication
You may be on therapy for months or even years and Freedom will be with you for the long haul by keeping in close communications with you. And you can feel confident that we are there for you - 24 hours a day!
