Chapter 1 - Positive Thinking and Self-Talk

Positive thinkers use self-talks to boost their self-esteem and confidence. Self-talk at one time was deemed, as a form of mental illness, yet new discoveries showed that self-talk is a healing process.

When people use self-talk they find answers to their problems. Sometimes people use self-talks through writing. What they do is write down their feelings, emotions, etc. The person writes everything that comes out of their subconscious and conscious mind and after reviews the information to find answers to problems.

Self-talk is encouraging and can relieve stress. When a person uses self-talk effectively, they not only find relief the person feels confident and the mind rewards them with positive thoughts.

How self-talk works:
Self-talk works in a way that the person communicates verbally or in written forms to self. The person brainstorms so to speak so that he/she can explore the mind to find new ideas that guide them to finding answers to financial problems, relationships, and other problems going on in their lives. You too can benefit from self-talk.

When a person self-talks often, they discover unnecessary stress that they can laugh over later. For example, sometimes we worry about things we have no control over, or things that just don't require worry, such as worrying about missing a television program. Sure, this is simple, but some people worry for no reason at all, which we can use self-talk to find laughter after realizing what we do.
Self-talk is more than just verbal communication with self. Self-talk comes in the form of writing. As I mentioned earlier, when you write your feelings it is a way to express your thoughts and to develop new ideas so that you can find answers to your problem. Self-talk also includes problem unwrapping.

To help you understand how self-talk works we can review a few strategies for your convenience. I would like to start with problem unwrapping.

**How to unwrap your problems:**

First, think of the intention. Our goal is to give you the chance to convey conflicts and resistance. First, however we will look at the intentions closely and see where it can arrive at in positive thinking.

To start you want to set limits. This is your structural ending that helps you to arrange, establish objectives for your purpose and to outline your strategies.

Next, you want to take advantage of information. Learn specified facts in regards to your history. Take time to find the correct misunderstandings and find some reasoning to learn this new information.

Go to the next step. Now supply information. Learn something new that you can provide facts too and use it to clear up any misconceptions.

Find a support team. Support comes in the form of a warm environment, friends, family, trust, rapport, etc. You want to build a positive relationship with you.

Move to focus. Change your subject so that you do not feel overwhelmed. At confusing areas, readapt your thinking so that you change your subject. This will help you gradually clear up your confusion.

Find clarification. Elaborate on your thoughts. In vague areas specify or place
emphasis where you see areas that need clarification. Move to discover so that you can eliminate confusion.

Find hope. Convey your expectations. Affirm that making changes is a great reward and is achievable. Learn to restore your morale. Boost your confidence by making necessary changes you see that will benefit you.

Next, catharsis so that you promote self-talk and find relief from your stress. Express your stress and unhappy emotions freely. Tell you that you are safe and it is ok to communicate. Talk through your problems and feelings freely, become your own best friend. Our inner strengths is the source that helps us to discover our positive mind.

Chapter 3 - Suggestibility in Positive and Self-Talk

How to apply positive self-talk and to employ the process of suggestibility to overcome fear of flying

Why should we want to overcome fear of flying, specifically?
While there are lots of fears experienced by a wide variety of people, probably one of the most common today is the fear of flying. It may not have a debilitating effect on everybody, but for a culture that relies so much on air travel it can be especially problematic for many people.

Some people who would rely most heavily on plane travel are of course those who fly most frequently, such as people who need to travel by plane for business purposes, or those who have family spread out over a wide area and the means with which to keep in frequent touch with them.

These people, however, likely spend so much time flying that they have been able to overcome whatever timidity may have experienced. Instead, it is the people who find themselves by necessity compelled to board a plane, perhaps to visit a relative in an emergency or to travel due to a recent relocation, who are most likely to find themselves suddenly forced to confront their fear. While it may be possible to book an alternative route, this is often cost-prohibitive, especially if travel is required over water. In such cases, it becomes especially necessary to confront the fear.

All right, so how do I employ positive self-talk techniques to help me overcome my fear of flying?
Because the process of employing positive self-talk techniques is really just the process of initiating a program of self-conditioning, many of the techniques used to employ the process are very similar to those used when a subject wishes to engage in self-hypnosis.
Bearing this in mind, subjects will be able to understand why in this instance it can be very helpful to employ the use of recorded tapes or CDs to help in training the mind to overcome the fear of flying. Tapes should obviously not be purchased pre-recorded but instead should be recorded in the subject’s own voice, thereby increasing the comfort level even of those people most resistant to the idea of suggestibility, since recognizing their own voice speaking to them is likely to lower their level of mistrust significantly. If tapes are unavailable or the subject is uncomfortable when using them, start speaking to one directly – the “old-fashioned” way! – Also works.

What should these tapes say?
It is important that subjects use the tapes not to stress what is currently the case, such as their fear of flying, but instead to stress what they want to be the case in the future. For that reason, they should be certain that the statements on the tapes reflect the reality that they want to take place. Some suggestions are:

I am proud that I can now do something I used to be afraid of
I do not have to be nervous or tense about the prospect of flying. I find it easy to relax.

It is lucky that I can use air travel to get where I need to go so quickly. This excites rather than alarms me.

My ability to overcome my fear of flying will give me greater self-confidence in all areas of my life. It will give me an increased sense of self-control.

I will manifest faith and confidence when I am on the plane.

Instead of worrying about my fear, I will adopt the ability to take control of it. I am in control of my fear and I will overcome it.
Chapter 4 - Positive Thinking in Suggested Self-Talk

Fear is probably the single-most thing in our lives that hold us back from success. When you have fear dwindling beneath the surface of our mind, often it encourages doubt. Doubt usually encourages low-self esteem, confidence, which all holds a person back from successfully gaining in life.

These conditions often have debilitating effects on one’s body and mind. Yet, we can use self-talk to remove these doubts and fear. First, you want to define your fear.

Some of us rely heavily on burying their fears rather than confronting them head on. The best way to face your fear is to discover your fear and face it head on. For example, if you are afraid of heights, take an airlift or plane ride and master that fear. Start taking one-step at a time to beat this fear. This is what I did to overcome the fear of heights. At one time, I literally fainted when walking up three steps on a ladder. Yet, determined I set out to master my fear, rather than allow my fear to master me.

How can I spend positive self-talk procedures to assist me with overcoming my fears?

Instead of worrying about my fear, I will adopt the ability to take control of it. I am in control of my fear and I will overcome it. The best way to overcome your fears is by using affirmatives.

Work with me:
Say: Rather than stressing over my fears, I will adapt the aptitude to take charge of my own life. I have control of my fears. I WILL leave these fears behind me.

I enjoin clear-cut faith and confidence that I can master my fears. My smarts to
overcome my fear of speedy resolve give me best self-confidence in all areas of my life. It will give me an increased sense of self-control.

It is fortuitous for me that I can use my fears to connect with me. Discovering and challenging my fears boosts my energy rather than alarming me.

I do not have to be anxious over the panorama of streaming. I find it plain sailing* to hang loose* with my fears.

The processes of employing positive self-therapy strategies truly are a process of directing yourself to reprogram your self-assurance-conditioning. Using many techniques, you can engage in the processes of intense positive self-talk to hook on to topics that guide you in engaging in self-relaxation and discovery.

Positive self talk insomuch as the processes of embellishing in useful self-talk skills is essentially the entire process of instigating a reprogramming scheme to warm-up to self-hypnosis tactics so to speak.

It is essential that subjects employ registers fear without shocking the mind. Sometimes you may come to headers that appear frightening, rather than running from these fears however, challenge them. Alternatively, to impact what you desire to become in the future you should remove doubt by making affirmative statements that reflect the facts. Make suggestions such as the listed affirmatives above. I will become master of my fear, rather than my fear mastering me.

**Affirmatives:**
In contrast, of burdening my mind and body over my constraints, I shall accept my abilities to take panel of my fears. I am the control board of my fears and I shall take mastership over these doubts that trap my mind.
I intend manifested faith and confidence when I make effort to master my fears. My proficiency to overcome my fears will supply me greater positive self-image-and confidence. My mastership will make available to me the new learning of self-panel. I am master of me and nor shall I allow fear master my mind and body again.

Using self-talk you can lose weight also.
Chapter 5 - Weight Loss in Positive Reflections and Self-Talk

How to apply positive self-talk and the self-hypnotic process to aid in a weight loss program

Can positive self-talk really help me to lose weight?

There is no single easy answer to this question, simply because there is no single, easy process that can be used to achieve foolproof weight loss. Certainly just sitting down and talking to yourself about losing weight will not be the only thing you have to do in order to accomplish weight loss, since positive self-talk does not work that way.

It cannot make pounds drop from your body, but if used properly and effectively it can help alter your mental state and your receptiveness to the idea of the various parts of a weight loss program that will lead you toward long term and healthy, balanced weight loss. Positive self-talk is not about accomplishing things without having to do anything one at all, but rather about motivating oneself to find the willpower needed to accomplish them.

What is the first step toward losing weight through positive self-talk?
First, you must make a definite decision about the weight-loss process. Begin by reminding yourself that you are fully committed to giving yourself a healthier body and more balanced lifestyle. Tell yourself how great you will feel once you have achieved your goals, and continually reinforce those goals as your own.

Next, you must determine if you are overweight and in need of a real diet and exercise regimen at all. Some people have been made extra-sensitive to the idea of their weight by hurtful comments made in the past or the mass-produced, media-generated concept of beauty, but may actually be a perfectly healthy
weight for their height.

In order to determine if this is the case for you, you must first consult a physician, who will tell you if your weight and lifestyle are currently healthy for you. If you are not, there may not even be a physical flaw in your current lifestyle but rather a health issue. Perhaps your physician will discover a thyroid imbalance or another health condition that has contributed to your weight, preventing you from achieving a healthy size.

If this is the case, no amount of positive self-talk will help you simply because a traditional weight loss program will not be of any use to you, and your problem will need to be dealt with medically. If, however, your problem is to do with diet and/or exercise, your physician may also have suggestions as to how you can go about losing weight healthily.

He or she may have vitamins to recommend, or perhaps suggest that you correct other health issues that would make the weight loss process difficult or even dangerous, such as anemia or high blood pressure. These serious conditions need to be corrected and monitored before you are ready to begin any sort of exercise program.

**After I have seen a physician, how does positive self-talk come into it?**

Once you have consulted with a physician, you can begin the process of positive self-talk as a guide to weight loss. Now that you have received some concrete facts from your family doctor, you have something on which to focus when you address yourself and the problem you wish to confront.

Your doctor will have given you some medical information about the weight loss process, and it is a good idea to keep this handy whenever you sit down to prepare yourself for the program. Consult the information and remind yourself
how healthy and great you will feel once you have completed the program, and reference the materials given to you by your doctor. They will provide a sound basis for reminding yourself of your goals as well as how possible it is to achieve them.

By spending several minutes each morning energizing yourself with these reminders, you will give yourself the incentive needed to start and maintain a healthy diet and exercise program conducive to losing weight. In addition to losing weight, using self-talk you can stop smoking.
Chapter 6 - Quit Smoking through Positive and Self-Talk Strategies

How to apply positive self-talk and the self-hypnotic process to aid in quitting smoking

Can positive self-talk really help me quit smoking?

Although positive self-talk will go a long way toward helping you quit, it is important to remember that in the end, the final decision rests with you. You must first truly want to and be committed to quitting your smoking habit before even the most powerful positive self-talk program can hope to be of any help to you.

What are some things I should do and say to myself in order to use positive self-talk to quit smoking?

- During your initial positive self-talk session as well as all the sessions that follow it is important that you remind yourself how much you want to quit smoking. During the first session, especially you will want to reinforce to yourself the decision that you have made to quit for good.

- You will want to tell yourself that the decision you have made to stop smoking is a final, concrete decision and that you will not put it off. You must stress to yourself that you are going to begin the quitting process immediately, not tomorrow or the day after tomorrow, and that you will not permit yourself any exceptions at all in any situation at all, granted that you want to give up smoking altogether.

- Repeat to yourself each day at least once a day the reasons you have listed for quitting smoking. These reasons may have come from the advice of a physician or a concerned loved one, or perhaps you are expecting children and are aware
of the life-threatening consequences to them should you continue to smoke. Are there any physical ailments that have led to your decision, such as a chronic cough, chest pains, asthma, or other health issue that make smoking exceptionally undesirable? Repeat all of these reasons to yourself each day in front of a mirror, reinforcing your decision to quit for good.

- Be sure to convince yourself of the hazards to your own health and the health of others should you continue to smoke. Remind yourself that smoking will never improve your health and will actually be a lifelong detriment to it if you do not stop. Convince yourself that you must be willing to give up certain pleasurable habits in order to benefit your health and the health of those around you in the long term.

- Tell yourself repeatedly that you will not buy any more cigarettes or cigars or whatever it is, you are inclined to smoke. Suggest to yourself that you will not only not buy any more cigarettes, but that if you should weaken into accepting one from an acquaintance, you will immediately discard it or break it in half.

- Tell yourself that you are now preoccupied, perhaps even obsessed, with the compulsion to abstain from smoking. Remind yourself that the longer you keep from smoking at a time, the easier it will be to keep from smoking for good.

- Tell yourself how proud of yourself you will be once you have mastered the habit you are trying to break.

- Make a list of all the things you will be able to do with improved health and the money you have saved by not purchasing cigarettes, and carry it around with you. Read the list aloud to yourself as often as you need to in order to remind yourself of the worthwhile nature of your goal.

- Keep a record of your progress. That way, each week you can remind yourself
aloud how long it has been since you last had a cigarette. As days turn to weeks, then months, and finally years, you will experience an ever-renewed sense of accomplishment each time you tell yourself how long it has been.

- Set up your stop smoking program through positive self-talk.
Chapter 7 - Setting up Your Stop Smoking Program in Self Talk and Positive Reflections

Smoking is a nasty habit. Not only does your mate kiss an ashtray, your insides start to turn black gradually and the arteries will harden. Smoking is something we want to avoid at all costs. Therefore, we have to learn how to set up our stop smoking program through self-talk and positive reflections.

Self-talk is an effective self-therapy strategy that trains the conscious and unconscious mind to either cease or start doing something. Self-talk enables you to adjust your behaviors for the better.

Self-talk involves cognitions, which you will learn to endorse and identify your maladaptive and to challenge your illogical thinking. In addition, you learn to challenge irrational emotions and thoughts. You learn to challenge your attitudes. This will help you to readapt your lifestyle so that you can succeed.

Self-talk allows you to readapt your behaviors. You learn to identify with you by relying on feedback.

Your maladaptive manners you will learn to identify by recognizing consequences that emerge from your decisions.

Self-talk guides you to self-control. Self-talk will encourage to master your senses and take control of your life by saying, I feel better when I do not smoke and tobacco is not my commander, rather I am the master of my will to do or not to do something that could cause me harm.

Self-talk involves positive use of feelings. When you learn to identify your feelings it intensifies you will to accept these feelings. You have a deeper awareness and
learn to take responsibility of your actions.

Self-talk gives you new insight. You gain encouragement by understanding the underneath reasons behind your actions. The dynamics and assumptions you gain insight of will help you explore your subconscious mind by finding new cognitions and motivation. Your behaviors you will review, as well as you attitudes, beliefs, feelings, etc.

As you move along likely, you will find causes behind why you smoke. This will help you by allowing you to accept. Once you accept you will find willpower to stop.

Using affirmatives, self-talk and at times role-play you can adjust your life by making new changes. Changes you will see in a new light. Rather than think of changes as a burden you will feel a boost in development to new adaptive abilities, skills, cognitions, behaviors, etc. you will find it easier to deal with friends, family or other folks around you.

Once you see ways to make changes. Start reinforcing these changes by self-talking your way through the processes. Use positive underpinning choices regarding your behavioral patterns. You will see your cognitions in view.

Using reinforcers move to challenge resistance. Use resistance in a way that you can conquer the impediments to improve and change effectively.

Now start to resolve the problems within your relationships. Start building a level functioning coalition and move to reconcile the ruptures. Contend with your dependency to rely on tobacco and then discover and determine these disturbances.

You will not find it easy at first to stop smoking. Yet if you work at it and continue
positive self-talk in time you will find it easier to stop. The first step is discovering the cause, move to effect and challenge the obstacles so that you can remove them.

Once you complete your therapy start moving along with your objectives, and begin implementing new ideas so that you can find ways to remove these nasty habits. Take time to gain structure in your life and then remove any inconsistencies when they come along. Challenge your issues and set goals. Set goals to stop smoking. Give yourself a timeline to stop by creating a plan to make it happen.
Chapter 8 - Hypnosis and Positive Self Talk

If you like and are comfortable with who you are, then chances are you do not need to work very hard at becoming a more appealing and charismatic personality. People who are most comfortable in their own skin are not the people who seek to improve on or alter their personalities.

If you feel satisfied with the person you are now then you are probably one of those people that worked hard to obtain a lovable personality. Common people who are most comfortable in their own tegument are not the rabble who nose* to improve on or alter their personalities.

Rather, it is those people who are shy, retiring or may be insecure in their own identities that are most likely to want to change something about themselves to make them somehow more appealing to those around them, not realizing that very often the person others see them as is merely a reflection of how they project themselves.

People who are less comfortable with who they are often reflect this, whether consciously or unconsciously, in the way that they interact with other people. If they are less outgoing and more retiring, what is in fact just a shy or insecure nature may even be seen as snobbish, cold, or uninterested in those around them.

These people are often misunderstood because they are unconsciously projecting an image of themselves that, while not accurate of their true selves, is really a reflection of who they believe other people think they are. Since other people will only reinforce this perception by reacting to their own misunderstandings of shy people, the shy person then becomes even more withdrawn, creating a truly unhappy cycle. It is these people and not those who
are confident in themselves and comfortable and happy with whom they are as people, who are most likely to want to change or improve their personality.

**How can positive self-talk help improve a person’s personality?**

While positive self-talk will not actually change somebody’s personality, it can be sued to change that person’s perception of him or herself and thereby alter the way in which they project themselves to others, altering in turn the way that others perceive them.

By reassuring themselves of their own attractiveness as people and the desirability of their own company, normally shy and retiring people can discover newfound confidence that they will then project to the world at large. It is much the same effect as is had when a friend gives us a sincere compliment about some aspect of our character; not only are we pleased to hear this, but we become more aware of this good quality and make an unconscious effort to put it forward more.

**What sorts of things should people say to achieve this change in their personalities?**

People should begin and end by reinforcing their own worth as human beings. It can be enormously helpful to make a list of all the kind of things you have said in the past concerning your personalities.

It can also be helpful to include a few compliments on physical appearance as well, since these also make us feel good and project confidence, but they should not be the focus of the self-talk, as physical attributes can change quite rapidly and should never be the focus of our evaluation of our own worth.

By repeating compliments other have given us we are able to remind ourselves
that other people have seen our worth as well, and have noticed it enough to remark on it to us directly.

Subjects should then build on the list of compliments with ideas of their own. They might want to list other admirable attributes they have that they want people to notice more, and tell themselves that they will begin to display these good qualities to others. As they reinforce their own value as humans, they will acquire an increased confidence in themselves that will not only be noticed by those around them, but also be reflected in the behavior of others toward the subject, turning a once-vicious cycle into a beneficial one.

Gain a new attitude in self-talk.
Chapter 9 - Attitude in Positive Thinking and Self-Talk

To achieve success we need to have a positive attitude. We can achieve this by using positive thinking and self-talk. People who succeed need to think positive and tell themselves that they can do it.

Being positive and telling yourself that you can do something like reaching that big dream you have for the future will change your attitude and make those dreams come true. Tell yourself that you can do it instead of thinking negative and let your self-think that the dream is too big you'll never make it that far. This is called affirmatives, which bring nice rewards.

Chapter 15 - Self-Talk and Positive Resources in the Subliminal Mind

Our personality tendency is a blend of our emotional cavities, beliefs, influential epidemic, mind-set* and perceptions. All straightaway factors concertedly generate the concept of that person as well as his manners. As the way of perceiving this is a smash part of making up one’s personality. This is the innermost impression that can also be as effectual in influencing one’s personality as in the conscious food from results.

A person that observes a motion picture for model will learn something at diverse levels. The film's message may become conscious to that person in an identified approach. Yet the colors scheme harmoniously engaged in that motion picture, its sound track, and the graphical terminal attuned as well as the cinematography itself may have selected subconscious or subliminal upshot on this person.

Many programs allocate to you research tools that may direct to a huge section of attainments from that motion picture, which maybe the subliminal in nature.

Humankind, which believes, and acts as activists in Self-assurance Talk concepts affirm that many alterations could crop up after scrutiny of any such motion picture or viewing a natural-based scene or something of the genus are unpaid to the subliminally learned abstractions. If concluded by correct edifice, Positive self-images and Talk can even fracture and assist the social order with civilizing themselves as individuals.

In the mod* era, the praise commercialism products have agreed over more than one alternative in promoting these products, which assist consumers in subconscious learning. Yet, what they missed is that self-talk does the same as these tapes, still the products are helpers that can promote self-talk.
The attorneys of Inner strength Talk accept as true that hoi polloi* can progress their qualities by enforcing them to listen to some designed successions of sounds in addition to musical relaxing sounds as a technique.

These sworn by testers are governmental believers that body politics* can enhance their manners by tapping into the subliminal mind. These marketers are making headway in their efforts since they have made the municipal opine that the stuff, which is portent to enhance a person’s personality tendencies by self-conscious learning practices, is a gnarly* one. Notwithstanding the other municipal grade schools of thought that will not reckon on it, unmoving, the negotiating of the products border to Self Talk and self-improvement of your personality by employing self-talk in fact over other alternatives.

Those members that have introduced alternatives indirectly now send instruments that claim actually to impress and to be capable of skyrocketing* our personalities and does not have a contentious uncertainty.

Some proletariats believe that speculation within the joints stuff was not worthy of and have not perplexed currency to the errant praise commercial product sellers. These other believers take the public to think that CDs are the programs they have purchased and are second-hand to Self Talk purposes, i.e. helpers to this self-therapy approach.

According to these venders and creators, some of the subliminal learning tools can assist with managing mood swings, smoking, drug addictions, etc, yet they fail to tell you that using innate skills can have the same effects. In fact, you can use self-talk practices and even combine them with role-play and receive above the results that most of these by-products will give you.

Before you spend money on marketing tools to stop smoking, lose weight, etc, sit down and challenge your innate abilities to control your mind, which includes
tapping into the subliminal or subconscious mind to find the tools that could lead you to success. You have options, use them rather than let them burn down on the kettle.
Chapter 16 - How Self-Talk Can Boost your Personality to Sound or Positive Outcomes

People have distinctive points of mind-set* despite the issues that transpire within the subliminal mind. There are a couple of very extensive medieval scholars of thought. One school may believe that it lacks an adequate amount of facts from empiric research, which could demonstrate that we acquire knowledge at the mysterious levels. The other school of brainstorm* favors learning from the subconscious mind.

This debate started several decades ago, which started amongst professionals in psychology that argued that the mind may or may not learn at the subliminal layers.

The other publicly known grade-level medieval scholar of thought is string pulling toward the subliminal literatures. These souls judge that our subconscious mind has much to do with the way we act out in public. Yet, not everything we do daily goes by the book of rules over cultural spans that we learn from felt efforts.

Many larger groups in a day wish that a sole deterrent case in point on another without knowing the rationalization. That is to the following drill of thoughts in the brains* learned facts at the subconscious floor.

This solely is not the municipal entry related to our Self Talk, yet many acts of our own could be in relation to these segments of discipline we don't know. One could learn much whilst practicing self-talk often however. It is possible to boost your mind and vocabulary by practicing positive self-talks each day.

Self-talk is the echelon of perception in which we can unmask in scientifically fashionable terms. The subliminal mind is noted as something, which is smaller in circumstance. The municipal medieval scholar of thoughts who believe that in
Self Talk we can learn from our surroundings devoid acknowledging it. Images generated during the 50s have been in the bull yard since that time. It has received hype in the 90s at what time it was deliberated by various primary psychologists that included self-talk.

These experts have been given headway due to the attention of subliminal products promoted by many companies, which supply you with tools to learn positive self-talk through subliminal training.

Despite the widespread discipline of thoughts and these believers, that state there is no strength comparable to past experiences. Advertisers and their allied companies execute friendly stuff geared toward positive Self Talk and have been stratagems enough in creating a pathway to the market. Today, you have a wide array of companies promoting self-improvement, biofeedback, accelerated learning, subliminal learning, positive and self-talk tools.

Self-Talk is the elevation of perception we cannot normally register. People have ended experiments and the practices lien that some of the experiments have been successful which proofs of human subliminal lore are.

We do not learn everything at school. Rather the majority of our knowledge comes from observation from our past experiences. We are many things, which we have our own opinions, and we are badly sturdy about it, but most people do not know this thought or how it originated. Straight out*, the party mind is a unique cluster of nerve cells.

Humans are largely more intelligent than our own appraisals can view. At what time we look at wisdom we index more than what we realize. This is our sanction of the people that suppose that our intuitive or subliminal mind is for practical purposes carving one’s personality. Whilst we may look at a scenic mountain view, our perceptions take in more than we realize, which rests below the floors
Thus, self-talk in a positive way, despite any claims is a useful tool we can use to enhance our quality of life. Discovery help in your subliminal mind through self-talk and positive thinking.
Chapter 17 - Subliminal Discoveries through Positive Self-Talk Practices

Maybe we don't come to know about that subliminal part of learning just then, but the thing we have embedded in the mind this way will remain with us. Our witty minds are actively working to methodize all these perceptions in a way, which makes us more knowledgeable and well rounded due to our letters. Thus, every item that is learned by our brain at a subliminal self or positive self-talk is recorded by it and all this recording and activity of our brain develops our personality.

Those who believe in learning also believe that the Self Talk can have lots and many effects on us. Self-Talk has a power of changing and enhancing our personalities. Personality of a person is a mix of his or her emotions, beliefs, views and perceptions. All these factors collectively generate the attitude of that person as well as the behavior. Now as the perceptions are an important part of making up our personality, the subliminal perceptions can also be as effective in shaping our personality as the subconscious or conscious ones.

A person who watches a movie for example will learn something at the subconscious level. The movie’s message will be understood by the person in a known manner. But the colors used in the movie, the sound tracks, the graphics used as well as the cinematography may have some subliminal effect on that person.

There may be a huge part of the learning from that movie which may be subliminal in nature. The people who believe and advocate the Self Talk concept believe that many changes that occur in a person after viewing any such movie or viewing a natural scene or some thing of the sort are due to the subliminally learned perceptions. If done by proper planning, the Self Talk practices can help people improve themselves as a person.
In the current era, the advertisers have used more than one option to promote the products, which help you in subliminal learning. The advocates of Self Talk believe that people can improve their personalities by listening to some special sequences of sounds and music as well as many such techniques. The advertisers are making all the efforts they can to make the public believe that the stuff, which is said to improve your personality by Self Talk, is a good one. Although the other school of thought does not believe in it, still, the sales of the products related to Self Talk and improvement in your personality by using them are great.

Whether these instruments are actually impressive enough to be able to improve our personality or not is a debatable question. Some people think that their experience with the related stuff was not worth it and they have just lost money to the deceptive advertisers. The others think that the CDs and the Soft wares they have bought and used for Self Talk purpose are very effective. They are good to listen to and are effective enough to bring a positive change in the personality of the user in very few days. Some people claim that the Self Talk aids have helped them control their mood swings.

Whenever we talk about any thing there always are good or bad things attached to it. There may not be as much advantages of Self Talk as the advertisers claim. Nevertheless, there may be few good effects this type of learning can create in a personality.

What suits us the best is to make best use of what learning aids are available. This you can do only by following all the instructions closely which have been given to you for using that particular Self Talk equipment. By doing so, your chances of getting the best out of this experience will be more. Using the subliminal in self-talk and positive thinking will benefit you in many ways.
Perhaps we cannot come to realize that our subconscious mind has information embedded inside and buried so that it takes some effort to extract the vital parts that can complete a detailed memory or experience we encountered. In fact, the subliminal parts learn when we are unaware of this. For instance, as you type an essay for your school and listen to music simultaneously in the background, your subconscious is taking in information whether you know it or not. You may hear a song on the radio that you do not know, yet somewhere down the road a trigger will slice your subliminal mind and you will start to recall the lyrics in that song.

The subliminal mind can work in your favor, and you can extract information daily from your subconscious and use it in your favor by improving your memory. You can do this through self-talk and training to positive thinking.

You cannot say that a product is worth it or not without you trying it. Unless you give, a it a chance and to the folks that do not believe in Self Talk, you cannot say that it is not possible. To make your experience worth it, you must obey the rules of the game. Listening to those inner self and other related products may be useful to bring the friendlier and nicer personality out of you. The people who believe in Self Talk believe in who they are.

There can be many effects on a person by this kind of subliminal learning. People use that stuff which is said to enhance the characters in them, which in turn result in making you more popular in your colleagues and friends. Every one likes to be praised by the people he or she lives with. Not every one has an easygoing personality, which is attractive enough for others to be likeable. Creating such traits in your own personality may be a dream for you. The Self Talk aids are said to be good enough to make you learn those things even with out you knowing it. You can only enjoy the change in your personality, which will
happen, without your efforts and you will be learning it at the Self Talk level.

There are many companies who claim that they can provide you with the best material in town to enhance your personality by learning from your subliminal mind through self-talk and positive thinking.

If you are serious about taking the steps to self-improvement and you want to enhance your personality by using the Self Talk aids, you should search for specific aids that will encourage self-talk.

Many of the websites nowadays specialize in such products. You can take a look on these websites and compare the reviews given about these websites by the people. The prices of the products should also be checked so that you can get the best products available. Another good idea is to talk to some psychologist or psychiatrist about it. As it is some thing in which they are very keenly interested, they will be able to guide you how to go about it.

We are in fact, more intelligent than our own estimates lead us to believe. While experts claim that average human being is only capable of using 10% of the brains power, thus they have mislead you, since you can use self-talk and positive thinking to improve your mind.

Our minds are a cluster of nerve cells that must create new cells in order to survive and to help us to succeed. This food called self-talk and positive thinking encourages these nerve cells. The opinionates in Self-Talk and Positive Submerged Mind Learning fail to see that this is a real therapy that can work.
Chapter 19 - Opinionates in Self-Talk and Positive Submerged Mind Learning

Broadly, speechification there is two theories held by the racketeers in this regard. One of the groups thinks that there is no such thing as latent learning and that we do not have the cleverness to use self-talk or good thinking to extract from this school in our mind.

They do not agree to the elemental apprehension and they think that there are not enough proofs from empirical research to ensure us that all like Self Talk happens. They think that we need many more proofs before we start believing in the powers of subliminal learning.

These people are not positive by the genuine proofs in the favor of hidden learning. Whereas this group of hoi polloi* with the opinion that Self Talk does not come across all the time and that this type of attainments is not that important are quite large in number but another group of a seriously strong opinion also exists.

This clutch of mortals believes in the hidden powers of subliminal mind. They hold that many enactments are proof enough, which can tell us that a person perceives more than what he knows that he perceives.

To them the theories formulated by the psychologists in this regard are very true. They have acceptable scoop* to be considered valid. It is a hot debate between these two groups of people that whether the Aplomb Talk occurs or not. Each side the groups have very able-bodied opinions and the puzzles have their own proofs to fortify their point of view.

This has been one of the most important debates in the history of science in the past few coon's ages. Although the concept was under discussion since 1950s it came to the lime light in 1990s and till now it is there. We have been
conscientious to the weltanschauung of one psychologist after another who has done his or her own research. Half of them understand in the powers of Self Talk and the other half seriously objects to the ambit of learning associated by subliminal learning. We still do not fraternize what the truth is. The scientists are lavish it their best and are trying to find the honest answer for us.

Positive self-image-Talk is basically the perception of ideas and learning by the human mind below the last floor of estimable sensation. The last stratum of detectable sensation is called the subconscious zone. When a person comprehends at this level of cerebellum promptitude, he or she learns that he or she has cultured something.

For example, if you listen to a song you effect is able to recall the sequence of words. That is duplexes you have lettered by the activity of glued to that melody. You identify what you have learned. You have developed a perception about it, which you know. However, there may have happened some subliminal learning. You may have perceived something more than that from this aura but you your self do not savor that this item has happened. The pack of society and scientists who do not believe in Self Talk plan for that this is all none learn.

This type of learning does not roost*. However, those who believe in it cerebrate that this thing emerges a lot of time. They think that much of our behavior facts from the subliminal type of erudition. This is one of the biggest debates especially between the people who have acknowledged psychology.

Many of the world-acclaimed psychologists have recently done their PhDs in this field. The reason is that it is a big in the bull yard and if one of the groups makes the other one believe that their point of view is right, there exert be a huge change in the intelligence quotient test grand unified theory. Until this minute, we do not feel what the distinct truth is. There area number of researches going on in the trip. We hope that the cryptogram will be resolved soon.
Many psychologists have defined how we learn from the subconscious mind. As there is a basic disagreement about the existence of subconscious learning, there are a number of different definitions, which have been given by different scientists. Basically, there is one common idea.

The subconscious mind is the learning by human mind without the person knowing it. For example, a person is looking at a flower. Some of the things he or she will note obviously and there are certain things he or she has perceived about that flower which he or she knows and understands.

According to mental experts, it is the level of our subliminal mind that actually has the last perception, which we can sense. This is politically incorrect. Nevertheless, according to those who believe in the Self Talk concept, there will be some perceptions, which will happen, but the person will not know about it. These perceptions may bring a change in his or her attitude; these perceptions may affect his or her personality without the person knowing it. This type of learning is subliminal learning.

The idea of Self Talk has been there for about a hundred decades. By now, yet it has become more important in the recent past. The major reason of its becoming so important is that there are now many companies who are selling their products in the market claiming that these products will help people in subliminal learning. Yet, many of these products fail to teach positive self-talk.

Now as the sales of these products are very high we need to check at this stage whether the Self Talk occurs or not. This is a debate, which needs all our attention at this pointing time. Scientists have given this debate all due importance, especially after the advent of Self Talk aids. Now we need to know
the truth very fast. There are many companies, which are making money by selling the Self Talk aid. If there is no Self Talk, we need to stop them from making such products.

The companies, which are selling their products in the name of Self Talk, also claim that they have studied the topic in detail and that they have proofs that their products are good enough to improve a person’s personality by increasing the level of subliminal learning. These companies mostly use audio and video tapes and CDs for the purpose.

Now there are few companies who have introduced some kind of soft wares, which are said to be capable enough to produce solid Self Talk effects. What these companies and others who believe in the power of Self Talk have to say is that the mind is working even when we are asleep.

We do not know that we are learning anything from the surroundings at the subliminal level but we do. As a result, these people think that the CDs with a particular arrangement of sounds and colors can be effective enough in improving and enhancing our personalities.

They believe that this type of material is all very good as it is harmless to others and it can help a person become a better person just because of the use of such things. Self-Talk has been one of the greatest debates in the recent past.

Until now, we do not have a concrete proof that whether this kind of learning happens or not. We cannot be sure about it as the theory is still in the middle. It is something we still have to prove. At the moment, we do not know whether it happens or not. As a result cannot be sure how true the effects of the Self Talk aids are. The companies, which are selling the stuff, claim that one can learn a lot by using those CDs, which are both audio and video. Many people believe in the power of such stuff and many do not. Learn about the misleading products to
get acquainted with self-talk.
Chapter 21 - Misleading Products in Positive and Self Talk

What they believe:

The material provided by the companies is actually in different forms. Some of the people believe that you need to embed the actual message deep inside the whole scene so that the Self Talk process detects it and you learn it without taking any burden.

Others believe that as there is no learning of subliminal nature, we need to know exactly what we are looking at or we are listening to. These things may have other effects. Generally, the video CDs made by the people who are working in this field are made as such to bury deep the actual object which should be getting the attention by adding sounds and more colors.

They think that in this way, the mind will be able to perceive the right thing at the subliminal level and the purpose will be served. Many people fail to see the use of some of the products that encourage subliminal learning. While some doubt may exist, facts present it also to these being useful tools. Yet what true good are they if it does not encourage self-talk. Self-talk is a natural process we have from creation, which is given to us as a tool to heal the body and mind.

Learning at subliminal level, is it some thing positive? People who believe in the powers of Self Talk believe that it is the best way to learn many things. As it will not take your energy and time, it is good. Nevertheless, other people from other school of thought do not believe in this. They think that the Self Talk may be very dangerous.

They think that the CDs used for subliminal Self Talk may not be very good for your health. If these CDs and software’s have any effect, it has to be negative. Basically the same debate continues. Half of the world is towards the right side of
the line and the other half is towards the left of the line.

Both sides believe strongly that their point of view is the right one. Both of the parties are not willing to accept the others point of view. The debate is going on and will continue to do so until some scientist gives us enough proof to believe that it happens or it does not.

Many people do not agree that elemental apprehension, since they feel that there is insufficient proof to make certain that Self Talk occurs from subliminal learning processes or musical aids. Many spectators believe that we need more evidence that we can use self-talk to extract from the subliminal mind.

Whether these CDs are hoax or not, the fact is, we can use self-talk and positive reflections to heal the body and mind. If you practice self-talk each day, you will, in time find yourself feeling positive and good about you. You can use this therapy without the aid of subliminal products.

The people that are not convinced that the process of self-talk to gain from the subconscious mind can improve their lives are only missing the opportunity to live happier. These groups of tribes may conclude that Self Talk does not happen all the time and that this rubric of learning from the subliminal is not relevant are very large in number but another combine of a exceedingly big opinionates also exists.

Some of these groups of people feel that within the boundaries of our concealed ministry of subliminal learning are restricted habitats that no man should ever explore. They regard that many incidents are establishment enough, which can tell us that a individual perceives more than what he knows that he perceives.
Chapter 22 - Self-Talk Leading to Positive Thoughts

Self-Talk is one of the biggest debates in the recent decades. While there is much debate the fact is self-talk has proven to work effectively down through the years.

There are clearly two schools of thought regarding the Self Talk debate. One school of thought believes that the Self Talk does not occur and there is nothing like a Self Talk process.

It must not be considered an important part of human learning. The other school of thought believes that this type of learning is common. Self-Talk is the type of learning in which our mind perceives below the final level of sensation. Now this kind of perception is made by a person without his or her knowing it.

At present, there are many companies, which are working in this field, and they are producing lots of stuff, which is said to be helpful to people who want to learn more by learning more through Self Talk aids. These aids are said to be effective enough to provide the people with right kind of perceptions. These perceptions in turn help the people in developing their personalities in a positive sense of word. People are generally fascinated by the concept of subliminal learning. Many people want to buy and try the subliminal aid stuff just because it has been a debate in the past and as a matter of fact, the debate is still continuing.

One half of the world is in the favor of Self Talk while the other half does not believe that any such thing even exists in this world. Due to their fascination of the whole concept, many people want to buy the CDs and other stuff to see if the Self Talk aids world as they claim or not.

We can say that learning from the subliminal mind occurs, and we have proof that self-talk can in fact heal the body and mind if handled correctly. Thus if you
want to take part in this experiment and you want to buy some Self Talk stuff for your self, you need to understand the concept in detail.

Knowing only the definition is not enough. If you are serious enough to participate in the experiments and want to experience the Self Talk according to the claims of the companies who are producing the related stuff, you must know the pros and cons of those aids first. You must know about the concepts held by both the groups first. Once you are done with it, than you can see for your self whether you should go for it or not.

Those who do not believe in the powers of Self Talk think that the approach of using Self Talk aids may be dangerous for human mind. The CDs, which are used to do so, have a particular order of arrangement of sound and colors. That may not be very healthy.

Some of the people think that it is a positive approach while others do not think so. Whether you are in the favor of this approach or not, you must not jump on the any available option in the market. This is a debate, which is still going on. We do not know what the actual truth is. In this situation, it is not possible for us to decide whether it is purely healthy to follow such aids or not. In this situation, what you need to do is to research and complete your homework before you find some thing right for your self to buy which can help you in subliminal learning. Start producing your self-talk therapy.
There are many companies, which are now working in the field of producing goods related to subliminal learning. Actually, the idea came from the theatre owner who claimed that he increased the sales of coke and popcorns by adding the frames of “drink coke” and “Hungry, Eat popcorns” in the movies, which were run in the theatre. He claimed that the sales have gone up by more than 50 percent.

The same things were tested by many other people but the results were not the same. In this situation, people do not know whether to believe in Self Talk or not. Thus, not all the equipment produced by the selling companies in this regard can be considered healthy enough to be trusted and used by one.

There are many types of products available in the market, which the producing companies claim that these are helpful in enhancing your personality by subliminal learning. Most often, the material is available as video and audio tapes and CDs. In the past, there was more trend of producing video tapes. Yet now the CDs are more commonly used thus the material is available in the form of CDs now. The CDs are both only audio and video as well.

These CDs have a particular arrangement of sounds and music in them along with the schemes of colors added to the video CDs. These arrangements are said to be effective enough to produce very positive results in the people who listen to or watch these CDs.

There are many available options in this regard. You can find lots and lots of stuff related to Self Talk if you go to the market and start looking for it. Going to the market looking for the right stuff may not be the best ideas there are many companies who claim to produce the best stuff in the field. If you want to get hold of some really good stuff, you should go for internet search first.
There are many companies who have their web interface now. Those companies who are producing the Self Talk stuff also have their websites. You can visit these websites and find the right products for your self.

**How to find self-improvement aids:**

The lists of all the available products are there on the web. One added benefit of searching the material through web will be that you will be able to compare the prices of the stuff in this way. This comparison is not possible if you try to search the actual market. You will not be able to take a look at all the available stuff and their prices if you go to the market yourself. You can only find the best possible products by thorough research with the help of the internet.

The web will help you compare the prices of the products as well as the reviews of the products. You must not jump on any or every available product. You must decide carefully which product you want to use.

If you want to search the web for the related products, you can start off with some good search engine. Search through Yahoo! Alternatively, Google search engine. These engines or any other search engine of the same class will be able to take you to the websites of those companies, which have made good name in the field of Self Talk aids production.

These types of learning products may benefit you and encourage you to start your self-talk therapy to improve your life. Acknowledged Skinnerian psychologists have long understood how effective positive self-talk can be, yet refused it because it pushed clients toward using natural resources instead. Self-talk is a great therapeutic tool but when you combined it with role-play you can gain immensely.
Chapter 24 - Self-Talk and Positive Role Play Strategies

Some of us have a hard time using self-talk as a useful tool to heal the body and mind. Most of the problems emerge from lack of understanding what self-talk can do for you. In addition, at one time wrongful allegations from various experts, groups of people, etc deemed self-talk as a clear indication of mental illness.

However, after experts explored more deeply the potentials self-talk could deliver, they later discovered that this is not only a self-therapy; it is a solution to heal the body and mind.

Self-talk is effective, yet when you apply positive thoughts and role-play strategies with the therapy, you have an extremely useful tool.

How self-talk and role-play work together:

The starting point begins with you have the willingness to heal. Set your goal first too so that you know what you want to accomplish from your natural therapy processes. For example, if you want to stop smoking, set a goal. What you are about to do is tap into your subliminal or subconscious mind to find cause. Once you find the cause, it will make it easier for you to accept responsibility, which will move you to take action.

Self-talk and role-play in motion:

Sit in a comfortable area in your home. Take a few minutes and breathe naturally. Inhale and exhale naturally, so that your breathing becomes natural. Relax your mind. You may have thoughts pondering you. Rather than fighting your thoughts, allow them to flow smoothly. If you find a painful area in your thoughts, let it go. You can only heal rather than suffer from painful memories by allowing them to let you see the cause, effect, and details to what caused the
Relax. Now, envision you in a comfortable environment. You can visit anywhere you like. Just let you know that you are safe in this atmosphere. Tell you that nothing can hurt you. You can visit a beautiful scenic garden, or the Colorado Mountains. Go anywhere you desire to go. If you have problems visualizing you in this safe area, briefly find a few images online and use them as aids to start your visualization process.

Once you have your images gathered and visions in mind. Picture you sitting across the room with you. You see you sitting in another chair. Picture this person (YOU) as someone you want to get to know better. Allow your thoughts to go. Free your mind when it starts to slow down.

Now, put yourself in someone’s shoes that you would like to become while “YOU” are sitting across the room in a comfortable environment and chair.

Now, start a communication with YOU. Say whatever you want to say to you. Keep it friendly.

Try to avoid bashing you, since your motive is to think positive while you become closer to you. Talk about your goals with “YOU.” Express freely your thoughts, feelings, beliefs, ideas, why’s, what’s, where’s, when’s, how’s, etc.

Think about your questions:

Why did I start smoking? (If applicable)
What caused me to start smoking?
Where did I start smoking? What was in the environment at the time that prompts me to smoke? What influences caused me to smoke.
When did I start smoking?
How did I start smoking?
What are my feelings about smoking?
What are my thoughts?
What do I believe about smoking?
What new ideas can I use to find the cause of my habit? What new ideas can I use to stop smoking?

**Now use affirmatives to invite positive thinking into your mind:**

I feel good when I am not smoking. When I do not smoke, I have more energy.

Smoking causes cancer. **Why would I want to endanger my life? Do I have such low regard for me that I would cause my body and mind this much harm?**

Keep moving along until you find the cause, and explore your history so that you can piece it together until you reach your goal to stop smoking if this were the case. Do this daily and you will find it easier each day to stop bad habits that could cause you harm. Relieve your stress with self-talk.
Chapter 25 - Self-Talk and Positive Stress Relief

Self-talk assembles and creates an interview of improvises within your mind. This process is flexible, which at times confrontations occur that causes a tug-of-war within your mind that may compete with your daily plans.

The masquerades cause a succession of changes, which may include reviewing your thoughts. You may challenge each duty you carry out daily. Your mind ceases to permit room for you to go without some talkfest*, remarks or computations about you.

When you become mindful of the processes in your mind, it is the start to taking back control of your life. You can use this control to eliminate unwarranted stress.

The mechanical kickbacks may cause you to place bombardments up, which often lead to negative thinking. You start to judge you. Your mind constantly estimates your actions, which can make you feel incapable. A person feeling incapable often lacks confidence, self-esteem and commonly feels excessively anxious as a result.

You want to convert this way of thinking so that your mind works in your favor. Some of this stress comes from your history. You will hold thoughts simple because someone in your life may have told you that you were not ingeniously ample.

Perhaps your parents spent their life telling you, “You can’t do this, you can’t do that.” You may have heard or told you, “on no account do I sew up.* this task is difficult, I do not qualify to manage this task.

This is influences. Influences play a vital part in our life and much too many times are most influences negative. You want to turn that “can’t” around and start
telling you that you can accomplish anything you put your mind to. Say it with me. “I can do anything I put my mind to do.”

Keep saying this each day and you will be amazed at the power you feel. Throughout your life, you probably produced many nonconforming statements of belief in regards to your appearance and abilities to function. You may have negative feedback you’re your biological parents, siblings, governess, peers, etc.

The fact is authorities when they give us negative feedback seem to stick around longer than the negative feedback we receive from unruly children. Despite, any negative feedback factors into the decisions you make on a daily scale. In fact, any negative feedback will come out in your attitude or behavior, and often you will not recognize this because it is rooted in your subliminal or subconscious mind.

Each day you live, these negative thoughts embed them inside your subconscious mind. Each negative thought whether surfaced or not affects you. You do not need anyone in your life slip* you up. These people are the exact people that will help cost your success if you allow them.

You may find it difficult to stay away from family members or friends that bring you down, but the fact is showing them tough love by staying away and averting your thoughts to positive thinking through self-talk will eventually win them over. Tough love always works, especially when you let your conduct do the walking.

When you start to recognize pressing thoughts surfacing, sit down and have a talk with you. Don’t allow these thoughts to rule you, rather take charge by challenging them and finding out where these thoughts come from.

Sit down and explore your inner self. Take time to review what is causing you to feel negative. Ask you, why you feel negative. Is it because someone made you
feel this way? Now review your accomplishments. What have you accomplished? How does these accomplishments equate with failure? Know what to do next.
Chapter 26 - Know what to do next in Self-Talk and Positive Thinking

Your inner actor presents itself in your behaviors, attitude, verbal communication, body language and so on. Sometimes it may seem that this negative actor refuses to vacate the premises and lingers with you for a long time. The gnarly* revelation* however enables you to control your thoughts. You can use self-talk to control your mind making it an assister to you, rather than a master of your every action.

Broadening your awareness is a great start to thinking positive. You can do this by encouraging self-talk in your daily life. Rather than beat yourself down each day, start inspiring your mind to talk good about you. “I am a good person and deserve success.” This is a start.

You must ripen into aware of the inner confab. Start by learning to note signals from your negative thoughts and then review to see what is tattling you. Open your awareness. Assume your intonations, visualizing them as you. Keep in mind that these voices is not you, rather it is your historic voices holding you back.

The verity that you have the ability to thrash out* means that you can recognize you have negative thoughts. Induce to pay deliberation to what you visualize you to be. Watch closely without buying into the negative thoughts. As you notice interruptive thoughts, rather than reject them, discuss with your mind why those thoughts exist.

Next, rather than reacting to what your thoughts tell you. You do not have to act in response to the disillusions in your mind. You can master this negative thinking by becoming aware of these thoughts as they emerge.

Nothing flat* you can tag along with your thoughts, just realizing these thoughts
are not your commander, rather you are the master of you.

When you feel as though you are crashing with your inner self, observe closer. Fill in the gaps with positive reflections. Use these gaps to your advantage.

You will start to notice this arriere-pensee being that these negative thoughts have drown you for many years.

Initially you created these shortly, negative dogmas about you, from the negative input you heard originally from your biological parents, faculty members or others who had demonstrated influence over you. Now, that you are a grown-up your being to discover that you have deep-seated this negative feedback into your own individuality type.

**Now start your self-talk process.**

The people that gave me negative feedback were immature and had no influence on me. Rather than being the person they think I am, I am the person I desire to be. I can accomplish anything I put my mind too and have achieved much from my life.

Sit down and review your accomplishments. What did you accomplish? Think about how you accomplished each reward you received.

Continue until you start feeling positive about you. Write down new thoughts that come to mind to help you recall these great accomplishments.

Sometimes your thoughts will border sporadically. When you are challenged with your performance or something that is arguing against, or has a negative effect on your mind, challenge it rather than allowing these thoughts to take control of you. Review what you learn as you practice self-talk so that you can learn from it.
without forgetting what you learned.

Well-behaved consciousness throughout your self-talk process is the start of learning to control your life. The mechanical coolers you have to the relentless offensively negative esprit d'escalier, afflictions as well as your assessments will uphold you, especially when you feel overwhelmed. Master them through self-talk, rather than allow them to master you and turn your thoughts into positive ones.
Chapter 27 - Success with Positive Thinking and Self-Talk

We all want to succeed in the world whether it is in health or life in general. Without positive thinking and self-talk, we won’t be able to get ahead and succeed in anything.

Negative thinking will get us nowhere in life. We need to learn to stop listening to our subconscious before it has a chance to take over and rule us.

Our subconscious picks up negative thoughts from things it has heard and embeds it into our brain. If someone has told you that you can’t do something, or you fail once why try again. These are just a couple of things that we have all heard one time or another.

Changing our way of thinking isn’t easy to do; so we have to think positive and tell yourself with self-talk that we can change. Keep repeating it so you can overpower the negative thoughts and change them.

Changing your thinking to be positive will take a while because our subconscious is always in the way with negative thoughts that no way are going to help us change how we think if we let them. Telling yourself that you’re going to change on how you feel about yourself or your job by repeating it repeatedly will over rule and win.

Think positive and you can use self-talk to get you anywhere you want to go in the future to success. Success is a lot of work for most of us and when you keep telling yourself that you can succeed you will go ahead and meet your dream before long.

Writing will help us succeed in the future by making and setting goals. Writing will
relieve stress that keeps us from doing many things in our lives. Stress will take over and control us just as our subconscious will.

Relieve some unwanted stress with the goals you have for the future by writing them down. Thinking negative thoughts cause stress and stress runs our bodies down causing depression. Don’t let stress and negative thoughts take control.

Start today on relieving stress and thinking positive to success. There is success out there for all of us when we tell ourselves we can get to the pot of gold at the end by making changes in our lives.

To relieve the stress we have to make changes. If your goal is to lose weight, you have to relieve the stress by not think negative things and change your diet. You want to change your thinking and diet so that it harmonizes. Exercise to lose weight is making changes in our lives by telling ourselves that we will find the time to exercise three times a week to help get rid of unwanted weight. Exercise will help to relieve stress by taking time for you to reach the goal of losing weight. When you make these changes that is thinking positive that you will succeed.

Success is all in the positive thinking and self talk that we can change the way we think and do things. We can relieve stress that is cause from the changes in order to succeed.

**Now work with me:**

I want to lose weight. I am willing to put forth the effort to lose five pounds in the next couple of weeks. I plan to exercise, diet and use self-talk to start thinking positive and to lose the weight I desire to lose. I will not fail, since I am confident that I can lose this weight in a timely manner. I do not expect more from me than I can manage.
Chapter 28 - How to conduct a relaxing positive self-talk session through preparatory relaxation exercises

Is it that important if I am relaxing during my self-talk session?

It may not be the most important thing about your session but it is certainly one of them. It is best to know how to set up your self-talk “station” to make yourself relaxed and comfortable as you conduct your session. These relaxation exercises will prepare you both for the positive self-talk process and to be more receptive to the suggestions you are giving yourself.

How do I conduct these relaxation exercises?

To begin these relaxation exercises it is very important to find a location where you can be certain that you will not be disturbed. If it is possible, it is also best to lock your door. Try to choose a time to conduct your relaxation exercises when there is very little external noise to distract you. If you live in a noisy or busy area or if the only time you have in which to conduct your exercises is likely to be a very loud or active one, you will want to invest in earplugs to help reduce external distraction. It is also best to choose a time when you know you will not be too tired to focus or indeed too worried to focus. Try to choose a time when you will not have a whole list of household chores or jobs lined up and waiting for you immediately after you are done. It is best to choose a time when your mind will be as clear as possible, and because of this it would be ideal for your relaxation times if you were able to take some time before them to just clear your mind and settle in.

Begin by arranging yourself comfortably on a soft but supportive surface such as a sofa or even a bed. Some people actually find that these locations are not conducive to relaxation since it makes them think of sleep, or relax too much, so they do better if they arrange themselves on the floor supported by a soft rug. It
is best if the subject experiment with a variety of surfaces and locations before determining what best suits a personal need. Sometimes a flat pad or firm cushion or pillow can also be helpful in being settled.

At what time you are sure that you have chosen the position that will offer you the greatest comfort and support available, lie down flat on your back with your arms resting on the floor at your sides, but not touching your body. Look up at the ceiling, and be careful that you do not stare but just allow your eyes to relax, and even to wander a little if that is what feels most natural to you when conducting this relaxation exercise. Give yourself time to breathe in and out in a relaxing and regulated fashion. Do not rush breaths or force them, but simply find the rate of breathing that is most comfortable in your position and maintain it.

As you practice your relaxation techniques, it is also helpful to practice your positive self-talk technique. As you begin to relax and settle in, encourage yourself by speaking in a level tone phrases like the following:

“It will take some time and patience for me to properly learn this relaxation technique. It will take some time for me to become very good at this, but I have the patience and desire to accomplish it.”
“I am going to master this relaxation technique.”
“I am going to convince my body to work for me. I will be able to improve my outlook on life by mastering this relaxation technique.”

Take back your power.
Chapter 29 - How to put the power of positive self-talk into action for yourself

Do I always have to have a specific goal in mind when I begin my positive self-talk sessions?

No, you do not always have to have one concrete goal in mind when you begin your self-talk sessions. It is true that having one particular goal or direction in mind can be extremely beneficial in helping you further your progress. in one particular area, but if you are looking to just generally improve your outlook on life and your ability to cope with trying situations, here are some helpful phrases that you can use in your positive self-talk sessions to accomplish that goal.

“I will remember to carry out everyday tasks that might sometimes slip my notice. I will make room for balance in my life, for time with my friends and family as well as time to myself.”

“I will not undertake any task that I know is beyond my ability to handle successfully.”

“When I choose to undertake a task I will make steady progress on it.”

“I will become more dedicated to the process of a complete and balanced life. I will become excited about improving my life.”

“Every time I practice my relaxation exercises I will do my best to make positive progress.”

“I am willing, eager and ready to make whatever alterations to my daily schedule and lifestyle that may be required to change my life for the better.”

“Each day I will devote some time and effort to improving my self confidence. I will work hard to become surer of myself and more self-possessed.”

“I want to gain an objective view of my life in order for me to see what aspects of
it should be improved on for me to achieve better happiness and improved success.”

“I will take time to make note of all my successes, and I will be sure to take pleasure in the results. I will also make every effort to learn from whatever failures or setbacks I may encounter, and be sure to view these as learning opportunities.”

“I will make every effort to change that which is in my power to change, but will also be careful to accept the things that are not within my power to change and instead work to changing my attitude toward and outlook on those things that displease me that I cannot change. Instead of becoming annoyed, I will try to become more philosophical about them.”

“My level of patience can be improved on. I will work to become less irritated by the pettier things in life.”

“I will avoid disturbing topics that upset me and those around me. I will not dwell on morbid or upsetting topics.”
“I will make every effort to focus on the pleasant things in life. I will focus on the sort of person I want to be.”

“I will make every effort to guard against my known weaknesses.”
“Twill make note of my past mistakes. While I will be careful to not dwell on them so much that they overshadow future successes, it is important to recognize them so I can learn from them in the future.”

“I will make every effort to make careful note of those obstacles that stand between me and my future happiness, health and general security and peace of mind. I will also strive to see how they can be surmounted.”
“If I encounter disappointment this will not shake my faith in me or my abilities,”
“I will be able to better concentrate and focus.”

“I will be able to remember things with greater ease. My memory will improve.”
“My self control will increase.”

“I will develop a peace of mind and sense of tranquility.”

Of course, these are only suggestions. For maximum results, it is best to make a personal list of what you want to achieve, and work from there. Relax with productive actions.
Chapter 30 - How to prepare for a relaxing and productive positive self-talk session

Does it really matter if I am comfortable or not when I prepare for my positive self-talk?

While nobody will be breaking down your door to scold you for preparing incorrectly if you do not set up for a positive self-talk session exactly the way recommended by most experts in the field of positive self-talk, it is still a very good idea to put a little thought and effort into the organization of your session.

There is a great deal of suggestibility involved in the process of self-talk, which simply put means that people who give themselves the self-talks are actually giving themselves a sort of hypnotic suggestion as well. The greater a person’s level of suggestibility, the more likely that the self-talk session will prove most beneficial.

Therefore, it is important to raise your level of suggestibility as much as possible while preparing for a session of positive self-talk. Because studies have shown that people who are more comfortable and relaxed in their environment tend to be more suggestible, since they will lower natural mental guards when they become more relaxed, it is a good idea to prepare an environment that promoted the greatest relaxation.

Of course, this sort of environment will vary slightly from person to person, as everybody relaxes in different ways for different reasons. It is best for the subject to find a room and situation that is comfortable for personal reasons, rather than conventional reasons. Just be careful not to make things TOO comfortable, since you don’t want to fall asleep!

Okay so I’m comfortable. Nevertheless, what are some other ways that I can use
to prepare for my positive self-talk session?

The first step to creating a productive environment for a positive self-talk session is to eliminate every kind of distraction! If you have a young, active and noisy family, it is best to be sure, they will be occupied in other ways, preferably out of the house entirely. As fun as it can be to have family around and even as relaxing as some people might find it, it is important that the only voice you hear during your positive self-talk session be your own, or else you may become confused in spite of yourself! You are going to be giving yourself some very specific instructions during your session and you may even be dealing with some personal, possibly private issues that you would rather not be overheard, so it really is most advisable to be certain that everybody is quietly occupied in some other part of the house. If necessary, make yourself a little “do not disturb” sign and hang it outside the room in which you conduct your sessions; that way your family will be sure to know that this is your personal, private time and they will need to come back later. For younger children it can be helpful to buy a simple egg timer, and teach them to know that until they hear the timer go off, Mummy or Daddy is off limits!

Some other ways that you can prepare for a productive and rewarding positive self-talk session may seem trivial but will make a big difference in the long run. Be sure to wear loose and comfortable clothing, set the temperature in the room to a comfortable level, and make sure you take care of all physical needs before you come in to begin your session. This could involve eating a nice, light meal if you expect to get hungry, and or using the washroom before you begins. This way you will be less distracted all around and in a better position to have a great session. Make good decisions when starting self-talk and setting goals.

In order to make a good decision we need to be thinking positive to overpower the negative thoughts. Think positive; like I can do this or I will manage this alone. Keep repeating these repeatedly until the subconscious gives up and back off to let the self-talk become positive.

If we are thinking and doing negative things in making decisions we will never get anywhere in this world. Our health will go down fast because you won’t be motivated to get out and exercise or to cook a healthy meal. Negative thoughts will take over and we lose control of ourselves.

You’re lying in the deep grass listening to the birds telling yourself to breath slow and deep. It takes practice to learn to relax but it will come by positive thinking and self-talk.

Light some candles in the bathroom and soak in a tub of hot water. Turn the
music on low and tell yourself that this is your time only. Be positive and talk yourself into relaxation by watching the candles burn down. Turning off the light and watching the flames burn while soaking and listening to soft music is a good way to learn to relax and think positive.

Chapter 33 - Self Talk the Right Stuff in Positive Thinking

Self-talk is a therapeutic practice that benefits us in many ways. Self-talk in short is mentally talking to self. You discuss with you things that you may say to yourself, such as negative or possible thoughts.

Self-talk is the process of adhering to self-therapy. When you talk with you, you self-fertilize by using words and thoughts to describe who you are. You work accordingly to your own admissions freely to possess particular qualities or behaviors that benefit you in a positive way.

Self-talk is complacency with self. You recurrently mentor or mention your personal achievements and display self-satisfied taken of these traits. During self-talk you may become ill at ease at times. You may feel intensely and awkwardly aware of your failures or shortcomings when in the presence of others especially and may believe others are noticing your behaviors.

If you are self-conscious, you may feel extremely conscious of your impressions made by others and have a propensity to act in a way that reinforces these impressions. You want to avoid this and develop positive thinking, taking them in tenure with all its features and power mandatory to function of your own accord. Rather than perceiving your personality as someone else may see it, you want to perceive you in your own light.

Self-talk then is the start of becoming the person that recognizes self.

If you struggle with self-talk practices, you may benefit from some of the subliminal CDs online. These items can encourage you to take part in recognizing the true you.
How to find Self-help guides:

Although the websites are the best sources to gain much knowledge about the required stuff, not all the websites are dependable enough to be considered authentic.

Many websites can add user comments on their own just to enhance the sales. To avoid this you need to know which of the companies are actually making it big in the market and what the actual reviews are.

If you want some really good stuff for yourself, another idea is to ask for the psychologist's advice. These people are dealing with the theory at all the times. As a result these people have to be the best informed about the Self Talk aids being used by people. Another way out is to find the right advice through the books.

Whenever you want to buy some new stuff for yourself, you must complete your homework first. Especially if you want to get some stuff like Self Talk aid, you need to work on it first.

As it has been a debate for past so many years, the psychologists have been paying more attention towards this topic lately. There are many researches being conducted in the field of Self Talk lately. Many universities of the world are currently involved in some kind of research related to this field of psychology. Not all of the people believe that this type of learning exists. Some of the people are doing their researches to prove that the Self Talk exists while others are trying to prove that the Self Talk does not exist. What ever is the reason, as the topic is a
hot debate for the past many years; the psychologists are trying to resolve this issue once for all.
Chapter 34 - Suggestibility in Positive and Self Talk

How to apply positive self-talk and to employ the process of suggestibility to overcome fear of flying

Why should we want to overcome fear of flying, specifically?

While there are lots of fears experienced by a wide variety of people, probably one of the most common today is the fear of flying. It may not have a debilitating effect on everybody, but for a culture that relies so much on air travel it can be especially problematic for many people. Some people who would rely most heavily on plane travel are of course those who fly most frequently, such as people who need to travel by plane for business purposes, or those who have family spread out over a wide area and the means with which to keep in frequent touch with them. These people, however, likely spend so much time flying that they have been able to overcome whatever timidity may have experienced. Instead, it is the people who find themselves by necessity compelled to board a plane, perhaps to visit a relative in an emergency or to travel due to a recent relocation, who are most likely to find themselves suddenly forced to confront their fear. While it may be possible to book an alternative route, this is often cost-prohibitive, especially if travel is required over water. In such cases, it becomes especially necessary to confront the fear.

All right, so how do I employ positive self-talk techniques to help me overcome my fear of flying?

Because the process of employing positive self-talk techniques is really just the process of initiating a program of self-conditioning, many of the techniques used to employ the process are very similar to those used when a subject wishes to engage in self-hypnosis. Bearing this in mind, subjects will be able to understand why in this instance it can be very helpful to employ the use of recorded tapes or
CDs to help in training the mind to overcome the fear of flying. Tapes should obviously not be purchased pre-recorded but instead should be recorded in the subject’s own voice, thereby increasing the comfort level even of those people most resistant to the idea of suggestibility, since recognizing their own voice speaking to them is likely to lower their level of mistrust significantly. If tapes are unavailable or the subject is uncomfortable when using them, start speaking to one directly – the “old-fashioned” way! – Also works.

**What should these tapes say?**

It is important that subjects use the tapes not to stress what is currently the case, such as their fear of flying, but instead to stress what they want to be the case in the future. For that reason, they should be certain that the statements on the tapes reflect the reality that they want to take place. Some suggestions are:

- I am proud that I can now do something I used to be afraid of.

- I do not have to be nervous or tense about the prospect of flying. I find it easy to relax.
- It is lucky that I can use air travel to get where I need to go so quickly. This excites rather than alarms me.

- My ability to overcome my fear of flying will give me greater self-confidence in all areas of my life. It will give me an increased sense of self-control.

- I will manifest faith and confidence when I am on the plane.

- Instead of worrying about my fear, I will adopt the ability to take control of it. I am in control of my fear and I will overcome it. Make reference to self-talk each day.

If it has no benefit at the present, put it in your mental filing cabinet, since something may come up later. Write it down also so you don’t forget.

The disruptive second* you commence to feel attentive of your thoughts, recognize the value of the thoughts as what the thoughts are, i.e. unerringly thoughts. Once more, these thoughts are not your master, except you are not complacent to take the steps to become the military officer of your own mind. Remove those obstacles out of your way.

Start thinking positive to build yourself to become stronger. Let your self-confidence and esteem come out in the open. People will turn there heads when you join in on a conversation with them instead of turning away and sitting in a corner.

Your co-workers will love working with you when you smile all the time and let them know you’re happy. Your friends don’t want to work with someone that is always down in the dumps.

As you begin to make new friends and they start asking you to join in at lunch or go shopping with them your mental health will improve and you’ll feel like your living in a new world.

You now have new friends, more energy to exercise, you look forward to a new day, and life will seems so much more important. Positive thinking will get you a long way in life. Use any support system available to you. Never think that you are alone. Someone out there understands what you are going through and are ready to lend you a hand or ear if you need it.

Don’t expect for you or others to recognize the changes right away. It will take time to change your thinking habits. How do you feel about life? It took many
years thinking negative and it will. Make your suggestions.
Chapter 41 - Making Suggestions in Self Talk and Positive Thinking

Suggestions can help guide you to self-talk practices, which lead to positive thinking. When you sit down and talk with you, you come to know who you are and start to feel better about yourself.

Use suggestions as a starter to get the ball rolling. For example, you may suggest that you have options.

**How it works:**
My options are large. I have the choice to make my life better if I put my mind to it. These are suggestions in some form that could guide you into a discussion to help you find ways to better your life.

Self-talk is a therapeutic practice. Self-talk to some people is inner thoughts they hear everyday. For instance, your mind may tell you that you forgot something. You then use this trigger to figure out what you have forgotten. This is a form of self-talk, yet to truly self-talk with you, you have to have a common communication.

**Self-talk:**
Do I have the ability to finish my job duties today? Sure, I do. I can finish them. What I need to do is knock off the large tasks and work through the smaller tasks. By the end of the day, I would have completed my tasks. I am getting started now.

**Self-talk:**
I drank too much last night. I feel worthless today. Am I worthless? No, I am not worthless I made a mistake and will work hard to avoid this mistake again. I learned from my mistake.
Self-talk:
Why do I make the same mistake repeatedly?
Brainstorm: What was the mistake? Why is it a mistake? How is it a mistake?
When did I first make the mistake? Who was I around when I made the first mistake?

Once you learn, what the mistake is you can start to recognize it as a mistake. Once you figure out why you made the mistake, you will move to accept and learn how to avoid the same mistake again. Pinpointing the timeframe that you first made the mistake will also help you find the cause. If you can figure out who influenced you, it will help you to remove the quality that causes you stress.

Self-Talk:
People don’t like me. Why don’t people like me? What did I do so wrong to make people not like me? Brainstorm: What kind of people do you associate with? Do you need these people in your life? Perhaps these people are judgmental and break out to point the finger at anyone.

Have you asked these people why they don’t like you? Perhaps they do like you. Perhaps you have a self-conscious problem that you can sit and self-talk through to find the cause.

Part of the problem maybe that you do not like yourself. How do you feel about you? DO you truly know who you are? What is your attitude about life? What is your attitude about you?

Use self-talk and positive thinking to get to know you better. This will help you find answers that have been sitting in front of you all along. Study each aspect of your self-talk. When you talk with you, listen as you would listen to your best friend when they talk to you.
Don’t take your self-talk too drastically. Instead, lighten the load. Have a little fun as you self-talk through your problems.

**Fun Self-talk:**
No one likes me. Therefore, what I have fictionalized characters that find me interesting. I don’t need others to like me, since I like my self and so do my fictional friends. Moe for example is my best friend, and he seems to think I have outstanding qualities. Well, except for the one. It seems to annoy him when I get angry quickly when someone asks me a question. Whoops, I just discovered something. Learn self-discipline.

**ME:** You are not missing the point. You are on track; it is me thinking about playing mini golf with the boys.
ME Reply, Boy where did that come from.

**ME:** It came from me feeling anxious to finish work tonight so I can relax and watch television for a change instead of beating this darn keyboard until my fingers swell and my mind inflates.
ME reply, so what is going on.

**ME:** I feel stressed and overwhelmed. I need to take a breath of fresh air so that I
can recover from writing long hours.
Me reply can we swing it.

Me: sure, we can swing it. As long as you don’t mind that I go into my little play world where all my friends that make me happy hang.

Me, wow…me finish, you are suppose to be helping.
Me reply, I am on a mental retirement plan, will help when I retire from this plan.

Chapter 49 - Reducing Risks in Self Talk and Positive Exercise

We can consider physical workouts to see how it can benefit us in many ways. Yet, we still need to consider exercises for the brain so that it can benefit too. While physical exercise will encourage the brain when you apply self-talk and positive thinking it will increase your mental and physical health even further.

Let's review exercise first to see what we can get from working out the muscles and joints.

Exercise is a great way to reduce risks of strokes, heart disease, and diabetes, and high-blood pressure, high cholesterol and so on. Working out often will help, since it strengthens the bones, cartilage, spinal column, nervous system, muscles and joints. Joints when flexibility will promote blood flow so that it goes to the brain freely. The tissues and cells also work properly when you exercise. This means that every time you build your muscles you brain benefits too.

Exercise includes cardio workouts, aerobics, strength training, and resistance training, and isometric and so forth. One of the recent exercise routines is the Pilate's plan. The machines and equipment will assist you with sculpting the body, yet you are not harming the joints. In fact, when you workout you should avoid overloading the joints. The joints are powerful instruments we have and when these joints are overworked, it could cause serious problems to incur.

Exercise will promote good health. Exercise prevents the muscles and joints from feeling stiff. When the muscles and joints are stiff, it opens the doors to inflammation, swelling, pain and other arthritic symptoms. When the joints and muscles are not working properly, it affects the central nervous system. The central nervous system rests, sending living cells information that channels messages through and from neurotransmitters on to the brain and spinal column.
If this area is interrupted, you are opening the door to some serious problems in the future.

Now that you have an overall idea how exercise can help you, check out how self-talk and positive brain exercises can benefit you too.

In fact, the central nervous system from failure to exercise, it affects the two hemispheres of the brain that divide and channel to the spinal cord. What happens is the four lobes are affected. These lobes include the frontal, parietal, temporal and the occipital lobe. When failure to exercise starts affecting the muscles and joints, the tissues, cells and central nervous system is affected, which also targets the brain? Now we see issues incurring, since the lobes contain our personality, intellectual works, motor speech, sensations, sensory integrated communications, spatial, vision, taste, smell, speech, and our capacity to hear.

**Break it down:**
When you self-talk and think positive, it effects these hemispheres in a good way. What happens is the brain starts building new cells, which replaces dying cells. Each time you feed your mind positive food and then work out with self-talk, you are building motor speech, sensations, intellectual, personality, communication, vision, spatial, smell, speech, taste, and so on.

This is the process of working out the mind. When you work out the mind, it will reward you in many ways. Yet, if you combine exercise, i.e. physical exercise with brain workouts you will live even healthier.

Now that you have an overview, sit and talk with you to get the ball in motion.
Self-talk:
I will start exercising today. I have the power within me to start working out my mind and body today. I will not slack. Each day that I awake, I will practice self-talk, positive thinking and working toward a healthier body.
Chapter 50 - Self-Talk and Positive Feelings in Awareness

Be positive and think about yourself. Self-awareness brings you to know your self-well... You will find balance and honest views of your own personality, and will frequently have the ability to interact with others frankly and confidently. Self-awareness then works with self-talks by building positive thinking. You just can't lose with self-talk.

How to find self-awareness through self-talk:
You start with finding a quiet area. Next, visualize yourself sitting across the room with someone else in the room. You are safe so don't worry. The person sitting across the room is you. You want to get to know this guy, because this is your best friend and the only true human being that you can trust for life.

Find out who this person by asking yourself how did I are hear. Where am I going in the future, do I like who I am. We need to like ourselves before we can accomplish positive thinking and self-talk. Find yourself and learn to like that person by building up your self-awareness to make your outlook on life happier and healthier for your own well being.

Make a list on how you feel about yourself. Write everything down that you want to know about yourself. Make another list using positive thinking and decide how you are going to improve to make you life that you are. Become a new person once you figure out who you are and how can you change.

Tell your self you can make these changes repeatedly. It will seem like forever before you see any changes. It took you years to get this far and as you go down the line you'll see your new you and so will others.

On the second list using positive thinking, ask yourself who I can make changes
to be a success. You might had had on the first list you don’t like the way you hair is. One the second list put down positive things like I want short hair instead of long like it’s been for 20 years. Be positive and say your going to get it cut next week to the style you like. Changing your hairstyle after 20 years that mom wants you to wear is a big change. Make changes slowly so you can give the brain time to learn that you’re going to wear your hair short so don’t self talk you into letting it grow back out into a 20 year old hair style.
